NEW Pro4-R BIG BRAKE KIT

KENNY BROWN
PERFORMANCE

BAER
BRAKE SYSTEMS

Features & Benefits

4-piston design saves weight and costs less

Top-loading for quick pad change

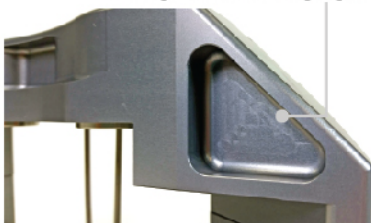

Banjo mount fittings

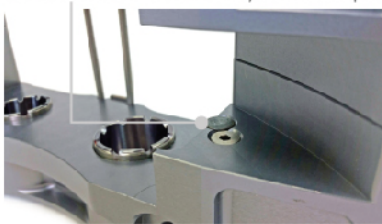

(6) 7/16" Holo-Krome USA made, certified hardware bolts hold the caliper together for extreme rigidity

Pocket machining for added weight savings without losing rigidity

Stainless pad abutment, so the pads do not ride/wear on the body of the caliper

HD 14"x1.25" slotted cooling vane rotors

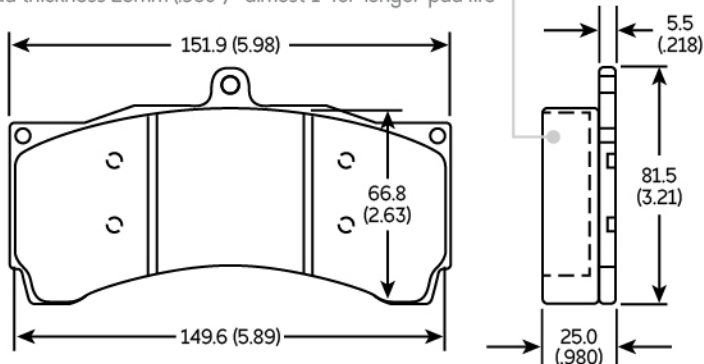

Calipers

- | 4-piston competition design
- | 1.75 and 1.375 pistons matched to your master cylinder, no master cylinder upgrade required
- | Thick stainless steel notched piston reduces heat transfer into caliper
- | Uses the BIG 6-piston 25mm (.980 in) thick pads for better longer life and better stopping power. Pads sold separately, several compounds to choose from for your application.
- | Fully machined aluminum 2-piece caliper
- | Strong machined aluminum anodized radial mount brackets
- | Pocket machined for additional weight reduction
- | Holo-Krome USA made certified hardware
 - (6) Massive 7/16" caliper clamping cross bolts for maximum stiffness
- | ARP radial studs with ARP 12 pt nuts for super strength
- | Top-loaded pad design for quick and easy pad replacement
- | Machined banjo inlet design into caliper for no pipe thread fittings
- | Stainless steel braided brake hoses with proper banjo ends

Rotors

- | HD 14"x1.25" directionally vaned slotted rotors
- | 6061 T-6 machined aluminum hats anodized black
- | Full floating rotor design with Bellville washers limiting noise

Takes big 6-piston brake pads for more grip (pads not included)
Pad thickness 25mm (.980") - almost 1" for longer pad life

All Brackets and Hardware Included

ARP hardware:
radial studs,
washers and
12pt nuts

Machined aluminum
black anodized 6061
T-6 Radial bracket

Deep, thick wall,
notched stainless
pistons

Stainless braided
brake hoses
