# BAER

## BRAKE SYSTEMS

Baer Inc. has expanding its line of performance brake products with the introduction of the Remaster: a fully machined billet aluminum master cylinder unlike any other available today. Baer engineered the Remaster with a compact design to make fitment easier in a variety of applications.

### Proportioning Valves

Standard block

ReMaster specific block

### Hardlines

Hardlines available for standard block proportioning valve & ReMaster specific block proportioning valve

Made in USA

602.233.1411

Standard & Custom Colors & Finishings available

### Features & Benefits

- | Compact billet body makes fitment easier while providing the high performance Baer is known for
- | Engineered for optimum balance between pressure and volume for great braking performance with reasonable brake-pedal effort
- | Fully machined body with bolt-on mount and machined screw in caps for easy access to fill (no tools needed)
- | Adjustable bolt-on proportioning valve available
- | Compact short design which allows this master to fit in a wide variety of applications
- | GM and Ford will use the same master (Firewall mount is designed to fit both)
- | Bolt on Firewall mount bracket. This master can be reused in other projects with a change of the bolt on bracket
- | Laser etched logos and part numbers for a finished look (on anodized version)
- | Designed, developed, machined and assembled in-house in Phoenix, AZ
